REPORT OF THE SCHOOL BOARD.

The board of education would respectfully present the following report of the schools of Swanzey for the past year, with a brief statement, also, of the schools for the year ending August, 1901, which we are required to report to the state.

We have had, during the past financial year, an average of $31\frac{1}{2}$ weeks of schooling for the eleven different schools. None of these schools have had less than 30 weeks, with the exception of the school known as No. 8, which had about 22 weeks, and then was discontinued for the want of a sufficient number of scholars for a full winter term.

The whole number of registered scholars for the year ending in August last, was 325; fifteen of these were under 6 years of age; fourteen were over 16 years, and 290 were between 6 and 16.

The agents appointed by the school board to make an enumeration in the month of April reported 283 boys and girls in the town whose ages were between 5 and 16. This difference in the number of scholars may be accounted for by the changes taking place with the inhabitants.

The names of fourteen scholars have been reported to us as attending high school the present year out of town, under the provisions of the new law.

It is evident that we are having too many schools in town for the number of scholars, and that if some of our small schools were united the cost per scholar would be less, and that the interests of the schools would be much improved. It is difficult for a teacher to keep up the inter-

ests of a school and make it profitable where there are not more than eight or ten scholars. It would be better if there were not less than twenty or twenty-five.

The citizens of the town, who want good schools should rightly consider this matter of bringing more of our schools together, and act both for the interests of themselves and the town.

For the success and prosperity which has attended most of our schools, we consider that much credit is due to the efficiency and faithfulness of the teachers. Those of them who have not had proper training and experience cannot always expect complete success in difficult schools. They may not always know their ability and adaptation. It has been our aim to put the right teacher in the right place, and retain that one there until a change is considered for the best.

GEORGE I. CUTLER,
JESSIE H. MARSH,
LUCIA E. WHITCOMB,
School Board.
